Stitch Atlas

Sew the world—the art of the embroidered map Katrina Emery

Centuries ago, embroidering a sampler map was a way of saying "this is my hood." Today, the map is still a popular canvas for the embroiderer's art, with everything from home territory or a personal journey to the space shuttle's deorbit map providing inspiration. From a close-at-hand local neighborhood to far-distant constellations, Stitch Atlas reveals how embroidery can be combined with cartography to create expressive map art, either to display or present as a gift.
